Artwork Information:

We prefer to have electronic artwork emailed to art@adglass.com. An electronic art file is considered “press ready” when the artwork is used as delivered. Any modifications that need to be made to the artwork may result in additional charges, or may cause delays on production time.(art charge is \$70.00g/hr.) As long as it is vector based line art, it normally will work just fine. Always assign spot colors, and remember to create outlines on all fonts. If built in Corel Draw, the artwork needs to be exported to an Adobe file - be it AI or EPS. Be sure your text is not smaller than 6pts, and line thickness no thinner than 0.5pts. File formats we CANNOT USE are the raster files, JPG, TIFF, BMP, PNG, DOC, PMD. Please note, up to 3/32 of an inch movement between colors on multi-color jobs

Virtual Proofs:

Due to the inherent nature of monitors,(varied calibrations, color management, varying degrees of brightness and resolution), the actual imprint color(s) and imprint location will vary the actual production run. Be aware, that most virtual samples are a visual guide and may not reflect the exact imprint placement for the actual production run. A true representation of your design is an actual pre-production proof/sample. An order must be in house, for us to create you a virtual proof.
